Upholstered Pods

Creating another new workspace for the agile working environment, manuka upholstered Personal Pods provide a new opportunity for greater differentiation in smart workspaces.

A combination of simplicity, practicality and wonderful aesthetics, emulating the natural environment, the manuka provides a more exciting workspace that maintains a compact and practical workstation, whilst still being able to make the workplace visually exotic and intriguing.

*SMART WORKSPACES

manuka

Personal Pods

Quite literally reshaping the future for Personal Pods. The organic hexagonal shape of the Personal Pods instantly makes the office space more striking, more importantly it steers away from the conventional 'boxed' pod, to create personal workplaces with a more comfortable, 'natural' aesthetic and character. In turn the Personal Pods provide a better work environment for focused performance. The luxurious finish and fine attention to detail sets Manuka apart and helps to release the stress often caused when working within high density working spaces.

Personal, practical and purposeful.

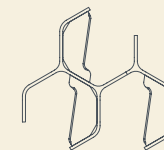

High panel height

Medium panel height

Polished worktops

The option of a nano-technology laminate finish on a polished ply ergonomic worktop

manuka

Personal 'Cluster' Pods

Two-tone upholstery may be specified, to enhance the aesthetic of each manuka booth or pod.

Ergonomic, shaped worktops are available in all standard MFC finishes at no extra cost and are also available in nano technology laminate surface on a polished ply core.

Key features

Elegant end caps

Elegant and practical nano-technology laminate top and end caps, on polished plywood. With low light reflectivity, it's ultra-matt surface is anti-fingerprint and features a very pleasant soft touch.

Power units

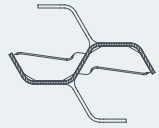

Power units may be easily incorporated, where required to ensure all your devices can be powered at the work station. Vertical wire management is made simple and effective.

Discreet feet

Discreet height levelling feet to provide maximum stability, even if the floor surface is uneven.

manuka

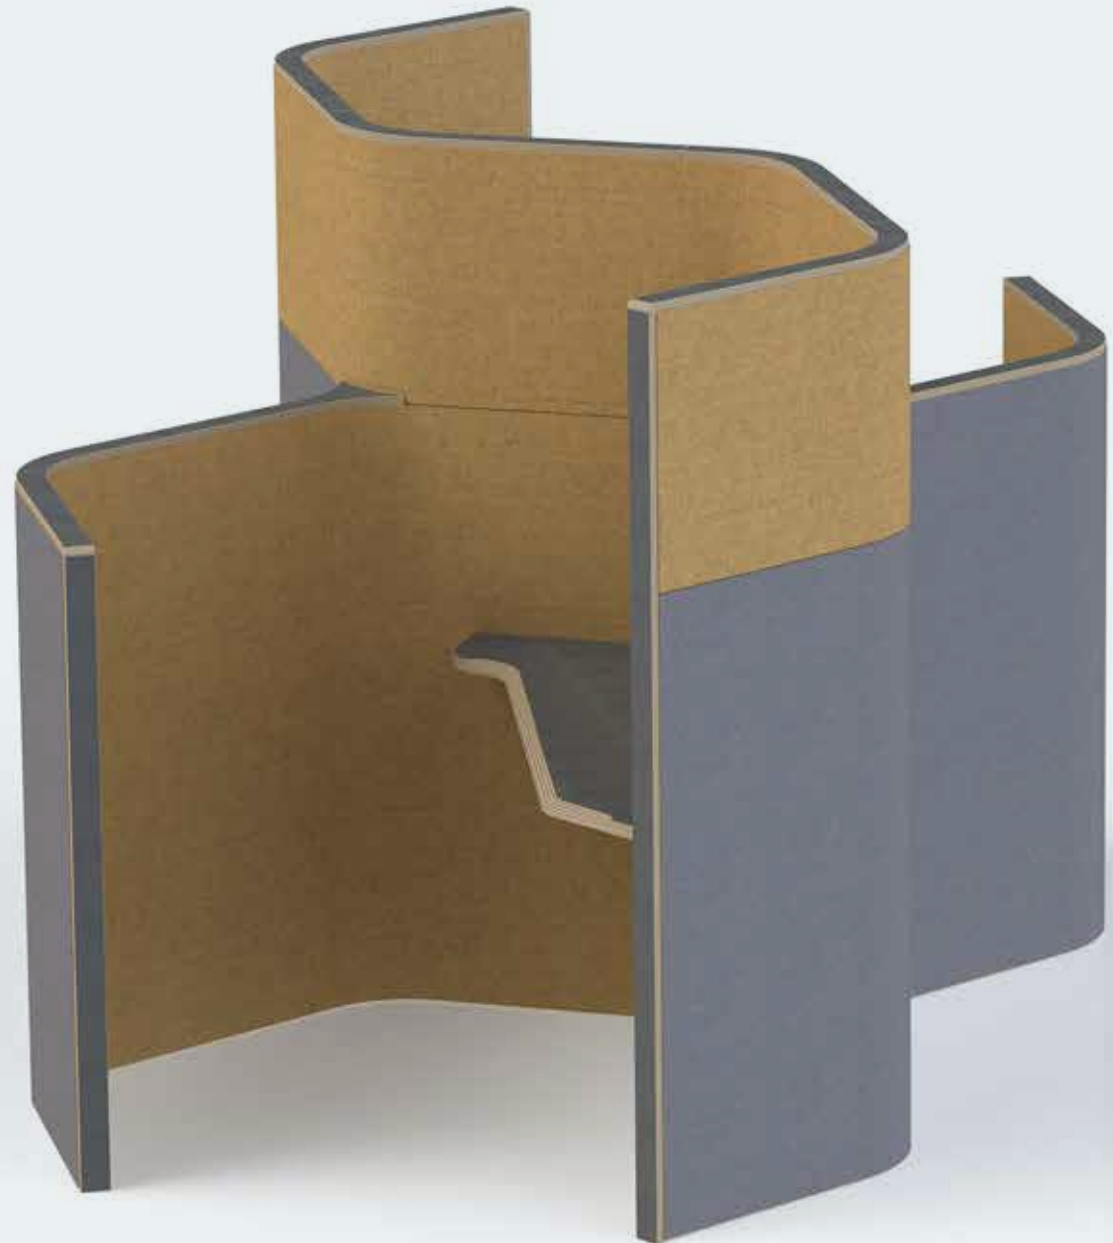

High Spine 'Cluster' Pods

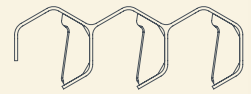

Manuka can provide you with the opportunity to create more interesting, focused working or studying environments within the busy 'open plan' office, with an even greater appreciation of aesthetics and acoustics than previously available.

With both high and medium height panels, these Cluster Pods provide privacy and acoustic control when required, as well as maintaining a visual connection with the rest of the workplace.

Through its elegant and ergonomic design Manuka can create a simple and clear architecture for the workplace, featuring high-tech laminate and sculpted, polished plywood finishes, combined with elegant upholstered panels up to a height of 1715mm.

Manuka has manukan designed to both absorb and block the transfer of direct, transmitted, reflected and diffracted sound.

manuka

In-line Pods

An 'in-line' adaptation of the Cluster Pod. Manuka's range of Personal Pods all provide excellent spatial comfort, so your personal workspace never feels too confined. Simple but effective acoustic and visual privacy and at little cost of room space.

manuka

In-line Work Booths

Similar to the Manuka Pods but with an open design for a more interactive workstation within the workplace.

Booths and Pods are available at two heights 1200mm and 1715mm to provide the opportunity for different levels of acoustic and visual privacy.

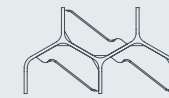

Blazer Lite Fabric

All panels are upholstered using foam backed Blazer Lite fabric from Camira, which is created from 100% Virgin wool.

Nano technology laminate

Top and end caps are manufactured from polished plywood with a nano technology laminate surface finish in Black or White as standard.

Back-to-Back Work Booths

The Manuka range offers products to suit all spaces and levels of acoustic privacy required in an open workplace. Manuka Back-to-Back Work Booths offer an open design for a more interactive workstation within the environment with enhanced acoustic privacy.

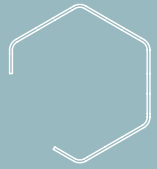

Focus Booths

Manuka can provide you with the opportunity to create more interesting, focused working or studying environments within the busy 'open plan' office, with an even greater appreciation of aesthetics and acoustics than previously available.

manuka

Quiet Pods

Manuka Quiet Pods can provide you with the opportunity to create a relaxed meeting space within a busy workplace.

*FIND YOUR QUIET SPACE...

Be as creative as you want; soft seating, tables, chairs or stools; it's your choice, you can decide how the space is utilised. With its simplistic, inviting form, Manuka Quiet Pods offer a great solution for meeting places within busy working environments and is complemented by fully upholstered acoustic panels, Manuka can easily create spaces for quick touchdowns, recharges or for longer work meetings that maintain privacy and aesthetics.

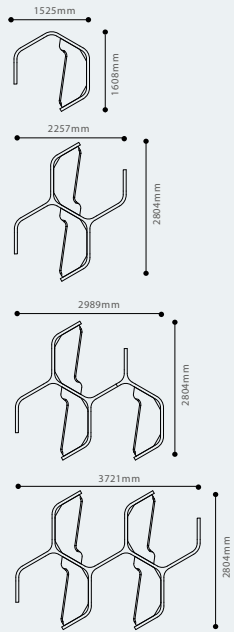

Medium panel height

Robust and sturdy, Manuka can provide an interesting and inspiring architecture for informal and occasional meetings.
